SAGE 300 DETAILS

If your company wants to compete in today's fast-paced business arena, you need to control costs in order to maximise profitability.

Available on-premise or online, Sage 300 (formerly Sage ERP Accpac) is a comprehensive business management solution designed to keep your total cost of ownership low by supporting multiple technologies, databases, and operating systems.

Comprehensive Accounting/Finance Applications

> General Ledger
> Accounts Payable
> Accounts Receivable
> System Manager with Bank Reconciliation for Cash Management

The powerful financial tools of Sage 300 help you confidently manage your company's complex finances and remain compliant with government regulations such as GAAP or IFRS. Features include full multicurrency capability, powerful bank reconciliation and tax reporting, flexible transaction processing options, powerful management of fiscal periods and informative dashboards for analytical reporting. Sage 300 Core Accounting modules help businesses succeed by accurately presenting valuable financial information in a clear, understandable format.

Multicompany and Global Operations Management

> Multiple Language and Localisation Support
> Multi-Currency Manager
> G/L Consolidations
> Inter-Company Transactions

Easily manage global commerce across multiple companies or subsidiaries. No matter where you do business, maximise your international insight and exchange information worldwide with Sage 300 Multicompany and Global Operations Management. Enhanced visibility into business metrics provides critical information at your fingertips for easier, smarter daily and long-term planning, providing the vision you need to respond to business trends while minimising risk and maximising the effectiveness of your decisions. Set up multiple companies in one or more databases, run processes, close books and report results by company or in a consolidated company.

Cost-Effective Operations, Distribution and Supply Chain Management

> Inventory Control
> Purchase Order
> Order Entry

Optimise operations and distribution processes to eliminate waste and deliver on time—every time. Accelerate growth, enhance customer satisfaction, and improve your bottom line. Sage 300 Operations and Distribution Management modules ensure your business follows best practices for efficiency and accuracy by automating and integrating processes to keep your warehouse, inventory, production, and service departments aligned and running smoothly. With features that support multiple warehouse configurations as well as multiple site customers, Sage 300 is optimised for a wide variety of distributors.

Faster, More Informed Collaboration and Decision-Making

> Standard Crystal Reports®
> Inquiry Tools
> Financial Reporter (FR)
> Alerts
> Business Intelligence

The business intelligence tools of Sage 300 help you increase insight into your business and make faster, more effective decisions. With real-time metrics and the ability to create personalised dashboards and meaningful reports, you'll have up-to-the-minute visibility across all departments and companies in your system and at-a-glance analytics that can be used for strategic planning. Using a single solution that ties together and streamlines all of your processes, Sage 300 helps you improve collaboration and accelerates information exchange for a 360-degree view of your business.

Customise and Personalise

Sage 300 is easy to set up and use, with intuitive wizards and a familiar interface that make configuration and navigation a breeze. Fulfil unique tracking and reporting requirements with the ability to add optional fields and capabilities. Define unlimited text, amount, date, time, integer, number and yes/no optional fields for use in all Sage 300 applications.
