MS Excel 2013 Level 3

2. MS Excel 2013 Level 3

Course description

The training in and use of Microsoft® Office Excel® 2013 has provided you with a solid foundation in the basic and intermediate skills for working in Microsoft® Office Excel® 2013. You have used Microsoft® Office Excel® 2013 to perform tasks such as running calculations on data and sorting and filtering numeric data. In this course, you will extend your knowledge into some of the more specialized and advanced capabilities of Excel by automating some common tasks, applying advanced analysis techniques to more complex data sets, collaborating on worksheets with others, and sharing Excel data with other applications.

Course duration

This course is scheduled for two (2) days from 9:00 till 16:00.

The course duration is an estimate and could vary according to levels of experience of the group.

Course pre-requisites

Good understanding and working knowledge of Windows generic functionality and Excel 2013: Level 1 & 2.

Documentation

The following documentation is included with the course

- Microsoft Excel 2013 Level 3 user guide
- Certificate of attendance

Course Objectives

Upon successful completion of this course, you will be able to leverage the power of data analysis and presentation in order to make informed, intelligent organizational decisions.

You will:

- Enhance productivity and efficiency by streamlining the workflow
- Collaborate with other workbook users
- Audit worksheets
- Analyse data
- Work with multiple workbooks
- Import and export data
- Integrate Excel data with the web
- Structure workbooks with XML

Who should attend?

This course was designed for students desiring to gain the skills necessary to create macros, collaborate with others, audit and analyse worksheet data, incorporate multiple data sources, and import and export data. In addition, the course is also for students desiring to prepare for the Microsoft Office Specialist exam in Excel 2010, and who already have knowledge of the basics of Excel, including how to create, edit, format, and print worksheets that include charts and sorted and filtered data.

Topics covered

1. Work with Multiple Worksheets

- Multiple Sheets
- Renaming Sheets
- Using the Clipboard Group
- Insert and Delete Sheets
- Copy and Move Sheets
- Worksheet Groups
- Applying formulas across sheets

2. Prepare and produce a spreadsheet

- Name ranges
- Working with named ranges
- Deleting a named range
- Creating names from a selection
- Using Paste Special
- Working with Links
